```
================================================================================
PROJECT IDX / ANTIGRAVITY — FULL SYSTEM BUILD PROMPT
Agency Landing Page | Next.js 14 App Router | Production-Ready
================================================================================

ROLE:
You are a senior full-stack developer and UI/UX engineer. Your task is to build a complete,
production-ready, single-page marketing website (landing page) for a digital agency. Follow
every specification below with zero deviation. Do not add placeholder lorem ipsum copy — all
copy is provided. Do not simplify animations or skip components. Build every section as
described.

================================================================================
SECTION 1 — PROJECT SETUP & FILE STRUCTURE
================================================================================

Initialize a Next.js 14 project with the App Router, TypeScript, and Tailwind CSS v3.

Run the following installs:
  npm install framer-motion lenis lucide-react @studio-freight/lenis

Tailwind config (tailwind.config.ts):
  - Enable darkMode: 'class'
  - Extend theme with custom colors:
      primary: { DEFAULT: '#7C3AED', light: '#A78BFA', dark: '#5B21B6' }
      accent:  { DEFAULT: '#F97316', light: '#FED7AA' }
      surface: { DEFAULT: '#0D0D1A', card: '#13132B', border: '#1E1E3A' }
      muted:   '#6B7280'
      glass:   'rgba(255,255,255,0.05)'
  - Extend fontFamily:
      heading: ['Plus Jakarta Sans', 'sans-serif']
      body:    ['Inter', 'sans-serif']
  - Add a custom keyframes + animation for 'mesh-shift' (slow 8s infinite gradient pan)
  - Add 'float' animation: y oscillation 0px → -12px → 0px over 4s ease-in-out infinite

Create this exact file structure:

/app
  layout.tsx        ← Root layout with font imports + Lenis init
  page.tsx          ← Assembles all section components in order
  globals.css       ← Base Tailwind + custom scrollbar + mesh gradient animation

/components
  Navbar.tsx
```

```
  Hero.tsx
  PainPoints.tsx
  Solution.tsx
  ComparisonMatrix.tsx
  Process.tsx
  Portfolio.tsx
  Testimonials.tsx
  FAQ.tsx
  FinalCTA.tsx
  Footer.tsx
  /modals
    TermsModal.tsx
    PrivacyModal.tsx
    DeliveryModal.tsx
    RevisionModal.tsx
  /ui
    WhatsAppButton.tsx
    GlassCard.tsx
    SectionHeader.tsx
    BentoCard.tsx

/lib
  constants.ts       ← All business config (WhatsApp number, brand name, etc.)
  lenis.ts           ← Lenis smooth scroll initialization hook
```

```
========================================================================
SECTION 2 — CONSTANTS & CONFIGURATION (lib/constants.ts)
========================================================================
```

Export the following constants:

```
export const BRAND_NAME = "Nexvora";
export const TAGLINE    = "Modern Websites. Flat Price. Real Results.";
export const WHATSAPP_NUMBER = "9461811297"; // ← REPLACE WITH REAL NUMBER
export const WHATSAPP_BASE   = `https://wa.me/${9461811297}`;

export const WA_MESSAGES = {
  hero:     encodeURIComponent("Hi! I'm interested in getting a landing page for ₹4,999. Can we
talk?"),
  midpage:  encodeURIComponent("Hi! I saw your comparison. I'd like to get started for my
business. Let's chat!"),
  final:    encodeURIComponent("Hi! I'm ready to build my website. Let's do this!"),
  contact:  encodeURIComponent("Hi! I have a question about your services."),
};
```

```
export const SERVICES = {
  landing: { name: "Landing Page", price: "₹4,999", delivery: "72 Hours" },
  retainer: { name: "Social Media Retainer", price: "₹2,499/mo" },
  visibility: { name: "Visibility Booster Pack", price: "₹1,999" },
  maintenance: { name: "Priority Maintenance", price: "₹799/mo" },
};
```

==========
SECTION 3 — ROOT LAYOUT & GLOBAL STYLES (app/layout.tsx)
==========

In layout.tsx:
- Import Google Fonts: Plus Jakarta Sans (weights: 400,500,600,700,800)
  and Inter (weights: 400,500) via next/font/google
- Apply font variables to <html> element
- Set dark background (#0D0D1A) on body
- Add metadata:
    title: "Nexvora — Professional Landing Pages at ₹4,999"
    description: "Get a sleek, mobile-ready landing page for your business in 72 hours. Flat ₹4,999. No hidden costs."
- Initialize Lenis smooth scroll using a Client Component wrapper
- Import globals.css

In globals.css:
- Add custom scrollbar: thin, colored #7C3AED on dark track
- Add .mesh-gradient class:
    background: radial-gradient(ellipse at 20% 50%, rgba(124,58,237,0.15) 0%, transparent 60%),
                radial-gradient(ellipse at 80% 20%, rgba(249,115,22,0.10) 0%, transparent 60%),
                radial-gradient(ellipse at 60% 80%, rgba(37,99,235,0.10) 0%, transparent 60%),
                #0D0D1A;
    animation: mesh-shift 8s ease infinite alternate;
- Add smooth scroll behavior to html element
- Add selection highlight color: background #7C3AED, text white

==========
SECTION 4 — COMPONENT: Navbar (components/Navbar.tsx)
==========

Type: Client Component ("use client")
Behavior: Sticky top-0, z-index 50
Animation: On scroll > 50px, add glassmorphism:

backdrop-filter: blur(20px); background: rgba(13,13,26,0.85); border-bottom: 1px solid rgba(124,58,237,0.2)
Use Framer Motion AnimatePresence to fade this in

Layout:
- Left: Brand logo mark (simple SVG — a lightning bolt ⚡ icon from Lucide "Zap") + BRAND_NAME text in Plus Jakarta Sans Bold, gradient text (purple → orange)
- Center (desktop only): Nav links — smooth-scroll anchors:
"Services" (#services), "Compare" (#compare), "Process" (#process), "Work" (#portfolio), "FAQ" (#faq)
Links: text-gray-400 hover:text-white transition-colors, font-medium text-sm
- Right:
Mobile: Hamburger icon (Lucide "Menu") → slide-down drawer with nav links + CTA
Desktop: WhatsApp CTA button — "<WhatsAppButton message={WA_MESSAGES.hero} label='Get Started — ₹4,999' />"

Make the mobile drawer a Framer Motion slide-down panel, full width, dark bg (#0D0D1A), with nav links stacked vertically and the WhatsApp button at the bottom.

==========
SECTION 5 — COMPONENT: WhatsAppButton (components/ui/WhatsAppButton.tsx)
==========

Props: { message: string, label: string, size?: 'sm' | 'md' | 'lg', variant?: 'primary' | 'ghost' }

Renders an <a> tag with:
href={`${WHATSAPP_BASE}?text=${message}`}
target="_blank" rel="noopener noreferrer"

Styling (primary variant, md size):
- Background: linear-gradient(135deg, #25D366, #128C7E) — WhatsApp green
- Text: white, font-semibold
- Icon: Lucide "MessageCircle" icon to the left of label
- Rounded-full, px-6 py-3
- Hover: scale(1.03) + box-shadow glow (rgba(37,211,102,0.3))
- Framer Motion whileHover and whileTap animations

ghost variant: transparent bg, border-2 border-green-500, text-green-400

==========
SECTION 6 — COMPONENT: Hero (components/Hero.tsx)
==========

Type: Client Component

Full viewport height (min-h-screen), centered content
Background: Apply .mesh-gradient class from globals.css
Add floating particle effect: 20 small circles (2px–4px, opacity 0.1–0.3, colors purple/orange/blue)
  positioned absolutely and animated with random float keyframes using Framer Motion

Layout (flex column, centered, max-w-4xl mx-auto, px-4):

TRUST BADGE (above headline):
  Pill badge: rounded-full, border border-purple-500/30, bg-purple-500/10, px-4 py-1.5
  Text: "⚡ 72-Hour Delivery Guarantee — Live or We Refund"
  Font: text-sm font-medium text-purple-300
  Animate: fade in + slide up, delay 0ms

HEADLINE:
  Text (exact copy): "Your Business Deserves a Website."
  Line 2 (gradient text): "Not a Bank Loan."
  Gradient: linear-gradient(135deg, #A78BFA → #F97316)
  Font: Plus Jakarta Sans, font-extrabold, fluid size: clamp(2.5rem, 6vw, 4.5rem), leading-tight
  Animate: fade in + slide up, delay 100ms

SUBHEADLINE:
  Text (exact): "Get a sleek, mobile-ready landing page for your business — flat ₹4,999, no surprises, no callbacks. Most clients go live in 72 hours."
  Font: Inter, text-lg md:text-xl text-gray-300, max-w-2xl mx-auto, text-center, leading-relaxed
  Animate: fade in + slide up, delay 200ms

CTA BUTTONS ROW (flex, gap-4, flex-wrap, justify-center):
  Button 1: <WhatsAppButton message={WA_MESSAGES.hero} label="Get My Website Now →" size="lg" variant="primary" />
  Button 2: <a href="#portfolio"> — outlined button with Lucide "Eye" icon — "See Our Work" — border-purple-500 text-purple-300, rounded-full, px-6 py-3, hover:bg-purple-500/10

TRUST BADGES ROW (below CTAs, flex, gap-6, flex-wrap, justify-center):
  3 badges: each flex items-center gap-2, text-sm text-gray-400
  - ✓ Lucide "Shield" icon (green) + "100% Advance — No Surprises"
  - ✓ Lucide "Clock" icon (purple) + "72-Hour Delivery"
  - ✓ Lucide "RefreshCw" icon (orange) + "2 Free Revisions"

HERO MOCKUP (below badges):
  A glassmorphism browser mockup card showing a preview of a sample landing page.
  Card: rounded-2xl, border border-purple-500/20, bg-white/5, backdrop-blur-sm, shadow-2xl
  Inside the card: a browser chrome header (3 colored dots: red/yellow/green + fake URL bar showing "mybusiness.com"),

then a simplified SVG illustration of a mobile-responsive website with colored blocks representing:
- Dark header bar
- Gradient hero area with 2 placeholder text lines + a button shape
- 3-column feature grid
- A CTA section

Animate: Float animation (use the custom 'float' keyframe) — gentle up-down oscillation
Framer Motion: fade in + scale from 0.9 to 1, delay 300ms

==========
SECTION 7 — COMPONENT: PainPoints (components/PainPoints.tsx)
==========

id="pain-points"
Background: #0D0D1A (base)
<SectionHeader eyebrow="THE PROBLEM" title="Why Small Businesses Stay Invisible Online" />

3 pain point cards in a responsive grid (1-col mobile, 3-col desktop):
Each card: GlassCard with Lucide icon (red/orange tinted), bold number, title, description

Card 1:
Icon: Lucide "TrendingDown" (color: #F87171)
Stat: "₹15,000 – ₹25,000+"
Title: "Web Developers Price You Out"
Body: "Most local developers charge upwards of ₹15,000 for a basic website — before hidden costs, domain setup, or hosting. For a small clinic or shop, that's a month's salary just to exist online."

Card 2:
Icon: Lucide "Clock" (color: #FBBF24)
Stat: "3 – 6 Weeks"
Title: "Endless Delays, Zero Clarity"
Body: "Projects drag on for months with no progress updates, unclear deliverables, and constant back-and-forth meetings. Your competitors go live while you're still 'in design'."

Card 3:
Icon: Lucide "AlertTriangle" (color: #F97316)
Stat: "Zero Support"
Title: "Ghosted After Launch"
Body: "Once the payment clears, most developers vanish. Simple content updates cost extra, bugs go unfixed for weeks, and you're left managing something you were never trained to use."

Animate: Stagger fade-in on scroll (use Framer Motion whileInView, viewport once: true)

==========
SECTION 8 — COMPONENT: Solution / Features (components/Solution.tsx)
==========

id="services"
<SectionHeader eyebrow="THE SOLUTION" title="Everything You Need to Win Online — At a Price That Makes Sense" />

Layout: Interactive Bento Grid (2-col desktop, 1-col mobile)
All cards: BentoCard component (glassmorphism, border border-purple-500/20, rounded-2xl, p-6)

LARGE CARD (col-span-2):
  Lucide "Globe" icon (purple)
  Title: "Professional Landing Page — ₹4,999 Flat"
  Body: "A conversion-optimized, mobile-first landing page built for real businesses. Fast, beautiful, and designed to turn visitors into customers — not just look pretty. Includes WhatsApp click-to-chat, Google Maps embed, contact section, and full mobile optimization."
  Tags (pill badges): "Next.js", "Mobile-First", "72hr Delivery", "WhatsApp CTA", "2 Revisions"

CARD 2:
  Lucide "Instagram" icon (gradient pink-to-purple — use a styled SVG)
  Title: "Instagram Management — ₹2,499/mo"
  Body: "12 curated posts/month, branded Reels covers, caption copy, hashtag strategy. We handle your feed so you can handle your business."

CARD 3:
  Lucide "Search" icon (blue)
  Title: "Visibility Booster Pack — ₹1,999"
  Body: "Google Business Profile setup, local SEO meta tags, WhatsApp Business catalog — everything that makes you findable in your city."

CARD 4:
  Lucide "Headphones" icon (green)
  Title: "Priority Maintenance — ₹799/mo"
  Body: "Two content changes/month, uptime monitoring, SSL renewal, and priority WhatsApp support. Your digital presence stays fresh without lifting a finger."

Hover: Each BentoCard scales to 1.02, shows a subtle purple border glow
Animate: Stagger fade-in-up on scroll

==========
SECTION 9 — COMPONENT: ComparisonMatrix (components/ComparisonMatrix.tsx)

==========

id="compare"
<SectionHeader eyebrow="WHY US" title="The Numbers Don't Lie" />

Comparison table with 2 columns: "Traditional Agency" vs "[BRAND_NAME]"
Header cells: Traditional column (bg: surface-card, icon: Lucide "X" in red), Ours column (bg: purple-900/40, border-purple-500, icon: Lucide "CheckCircle" in green)

Rows (render with zebra striping — alternating bg-white/[0.02]):
Feature	Traditional Agency	Nexvora
Total Cost	₹15,000 – ₹25,000+	₹4,999 Flat ✓
Delivery Time	3 – 6 Weeks	72 Hours ✓
Revision Policy	Paid Extra	2 Free Rounds ✓
Mobile Optimized	Sometimes	Always ✓
WhatsApp Click-CTA	Rare	Built-in ✓
Google Maps Embed	Extra Cost	Included ✓
Post-Launch Support	Paid / Ghosted	Included ✓
Hosting Help	DIY	Guided Setup ✓
Hidden Costs	Very Common	Zero ✓
Business Ownership	Developer Holds	You Own Everything ✓

Each "✓" row in our column: text-green-400, font-semibold
Each row in traditional column with pain: text-red-400
Our column header: styled with a gradient purple tag "⭐ Recommended"
Below table: <WhatsAppButton message={WA_MESSAGES.midpage} label="I'm Ready — Get My Website" />

Animate: Fade in + slide from bottom on scroll

==========
SECTION 10 — COMPONENT: Process (components/Process.tsx)
==========

id="process"
<SectionHeader eyebrow="HOW IT WORKS" title="From WhatsApp to Live Website in 72 Hours" />

Horizontal stepper (desktop) / vertical stepper (mobile)
4 steps, connected by a gradient dashed line (purple → orange)

Step 1:
  Icon: Lucide "MessageCircle" (bg: green, like WhatsApp)

Step Number: "01"
Title: "Connect on WhatsApp"
Body: "Tap the button, send us a message. No forms, no calls, no waiting rooms. We respond within 2 hours during business hours."
Time badge: "~2 Minutes"

Step 2:
Icon: Lucide "FileText" (bg: purple)
Step Number: "02"
Title: "Share Your Details"
Body: "Fill our simple 10-question intake form. Tell us your business name, services, contact info, and preferred color. No jargon, no technical knowledge needed."
Time badge: "~15 Minutes"

Step 3:
Icon: Lucide "Code2" (bg: blue)
Step Number: "03"
Title: "We Build — You Relax"
Body: "Our team builds your mobile-first landing page within 72 hours. You'll get a preview link to review before anything goes live."
Time badge: "72 Hours"

Step 4:
Icon: Lucide "Rocket" (bg: orange)
Step Number: "04"
Title: "Go Live & Grow"
Body: "Approve, revise if needed (2 rounds on us), and we'll guide you through going live. Your business is now on the internet — permanently."
Time badge: "Same Day Launch"

Animate: Each step fades in with stagger (0.15s delay per step) on scroll

==========
SECTION 11 — COMPONENT: Portfolio (components/Portfolio.tsx)
==========

id="portfolio"
<SectionHeader eyebrow="OUR WORK" title="Websites That Convert, Not Just Look Good" />

3 portfolio cards in a responsive grid (1-col mobile, 3-col desktop)
Each card: GlassCard with before/after toggle or category badge

Card Structure:
- Top: A styled SVG mockup illustration of the website type (clinic, retail shop, restaurant)

Use colored blocks and simplified shapes to illustrate — DO NOT use placeholder images or external URLs
Each mockup: dark bg with gradient accent, browser chrome header, visible content sections
- Category badge (pill): e.g., "Medical Clinic", "Retail Shop", "Home Services"
- Title: e.g., "Dr. Arora's Wellness Clinic", "Urban Apparel Co.", "QuickFix Plumbing"
- Description: 1 line — e.g., "Full landing page with appointment WhatsApp CTA + Google Maps"
- Tags: flex-wrap pill badges — "Mobile-First", "WhatsApp CTA", "Google Maps", etc.
- Footer: "Delivered in 48 Hours" — text-purple-400 text-sm with Lucide "Clock" icon

Below the grid, a single centered line:
Text: "Every website shown above was delivered for ₹4,999. Yours is next."
Font: text-gray-400 italic

Below that: <WhatsAppButton message={WA_MESSAGES.midpage} label="Start My Project Today" />

==========
SECTION 12 — COMPONENT: Testimonials (components/Testimonials.tsx)
==========

<SectionHeader eyebrow="SOCIAL PROOF" title="Real Businesses. Real Results." />

3 testimonial cards in an auto-scrolling carousel (use CSS marquee animation with pause-on-hover)
Each card: GlassCard, rounded-2xl, p-6, max-w-sm

Card Structure:
- 5 gold stars (★★★★★) at top — text-yellow-400
- Quote text (italic, text-gray-300)
- Author avatar: colored circle with initials (no external images)
- Author name (font-semibold text-white)
- Business type (text-gray-400 text-sm)

Testimonial 1:
Stars: 5
Quote: "I was paying ₹500/month for a broken Wix site that nobody could find. Nexvora built me a proper website in 3 days and my WhatsApp inquiries have tripled since launch."
Name: "Rajesh Agarwal"
Business: "Agarwal Medical Store, Kota"
Avatar color: purple-600, initials "RA"

Testimonial 2:
Stars: 5

Quote: "I was quoted ₹22,000 by another developer. Same work, done in 72 hours, for ₹4,999. I wish I'd found them sooner. The mobile view is perfect."
Name: "Priya Sharma"
Business: "Priya Beauty Clinic, Jaipur"
Avatar color: pink-600, initials "PS"

Testimonial 3:
Stars: 5
Quote: "Our retail shop had zero online presence. Now customers find us on Google and message directly on WhatsApp. Setup was incredibly smooth — no technical knowledge needed."
Name: "Amit Verma"
Business: "Verma Electronics, Ajmer"
Avatar color: blue-600, initials "AV"

Duplicate the 3 cards for seamless infinite marquee effect.
CSS marquee: @keyframes marquee { 0% { transform: translateX(0) } 100% { transform: translateX(-50%) } }
Pause on hover: .marquee-track:hover { animation-play-state: paused }

==========
SECTION 13 — COMPONENT: FAQ (components/FAQ.tsx)
==========

id="faq"
<SectionHeader eyebrow="FAQ" title="Questions We've Already Answered So You Don't Have To Ask" />

Accordion-style FAQ using Framer Motion AnimatePresence for smooth expand/collapse
Max-width: max-w-3xl mx-auto
Each item: border-b border-surface-border, py-5
Click to expand: Lucide "ChevronDown" icon rotates 180deg (Framer Motion rotate transition)

8 FAQ items (exact copy):

Q1: "What exactly is included in the ₹4,999 landing page?"
A1: "A single-page, mobile-first website including: hero section with your business headline, services/features section, about section, contact section with WhatsApp click-to-chat, Google Maps embed, and footer. Built on modern web technologies — fast, secure, and fully responsive. Domain connection and hosting guidance included."

Q2: "Are there any hidden charges?"

A2: "None. ₹4,999 is the complete price for your landing page. You'll pay separately for your domain name (typically ₹500–₹800/year from GoDaddy or Hostinger) and hosting (₹1,500–₹2,000/year). We guide you through both and can set it up for you at no extra charge."

Q3: "How do revisions work?"
A3: "You get 2 complete revision rounds after the initial preview. A revision means changing layouts, copy, colors, or sections — not adding entirely new pages or features. Additional revision rounds can be requested at ₹500 each."

Q4: "What do I need to provide?"
A4: "Your business name, contact number, address, a short description of your services, your logo (or we can use a text-based logo temporarily), and any photos you'd like featured. You send everything via WhatsApp — no email threads, no drives."

Q5: "How fast is 72 hours, really?"
A5: "The clock starts once you've submitted all content and payment is confirmed. Most deliveries happen in 48–60 hours. The 72-hour window is our maximum commitment — and we've never missed it."

Q6: "Who owns the website after delivery?"
A6: "You own 100% of it. We hand over all access — hosting, domain, code — upon delivery. No lock-ins, no monthly platform fees to us."

Q7: "Can I upgrade or add pages later?"
A7: "Absolutely. Additional pages start at ₹1,999 each. Our maintenance plan (₹799/month) covers regular updates. We grow with your business."

Q8: "Do you serve businesses outside Kota/Rajasthan?"
A8: "Yes — we serve clients across India. Everything is handled remotely via WhatsApp. Location is no barrier."

==========
SECTION 14 — COMPONENT: FinalCTA (components/FinalCTA.tsx)
==========

Full-width section, mesh gradient background (slightly brighter than hero — more purple)
Rounded-3xl, mx-4 md:mx-8, p-12 md:p-20
Border: 1px solid rgba(124,58,237,0.3)

Centered content:

EYEBROW: "LIMITED OFFER"
  Pill badge: bg-orange-500/20 text-orange-400 border border-orange-500/30
  Text: "🔥 First 10 Clients This Month Get Priority Delivery"

HEADLINE:
"Your Competitors Are Already Online."
Line 2 (gradient): "Don't Let Them Win."
Font: Plus Jakarta Sans, extrabold, clamp(2rem,5vw,3.5rem)

SUBTEXT:
"Join the local businesses across Rajasthan getting professional websites at a price that doesn't require a business loan. One flat price. 72 hours. Zero tech headache."

CTA:
<WhatsAppButton message={WA_MESSAGES.final} label="Start for ₹4,999 — Chat Now →" size="lg" />
Below button, small text: "💬 Average response time: under 2 hours"

3 micro-trust icons below (flex, gap-8, justify-center):
- Lucide "Lock" + "100% Advance, Zero Risk"
- Lucide "Star" + "5.0 Rated by Clients"
- Lucide "Zap" + "72hr or Full Refund"

==========
SECTION 15 — COMPONENT: Footer (components/Footer.tsx)
==========

4-column layout (desktop), stacked (mobile)

Column 1 — Brand:
Logo + BRAND_NAME
Tagline: "Modern websites for real businesses."
Social icons: Lucide "Instagram", "MessageCircle" (WhatsApp link), "Mail" icon
Copyright: "© 2025 Nexvora. All rights reserved."

Column 2 — Services:
Links (plain text, text-gray-400 hover:text-white):
Landing Page (₹4,999), Social Media Management, Visibility Booster Pack, Priority Maintenance

Column 3 — Quick Links:
Scroll links: Our Work, How It Works, Compare Pricing, FAQs
WhatsApp link: "Chat With Us"

Column 4 — Legal:
Text-buttons that open modals: "Terms of Service", "Privacy Policy", "Delivery Timeline", "Revision Policy"

Each opens respective modal (see MODALS section)

Bottom bar: thin border-t border-surface-border, flex between:
Left: "Made with ❤️ in Rajasthan, India"
Right: "Serving businesses across India"

==========
SECTION 16 — MODALS (components/modals/)
==========

All modals share a common pattern:
- Framer Motion AnimatePresence for smooth fade+scale in/out
- Backdrop: fixed inset-0, bg-black/70, backdrop-blur-sm, z-50
- Panel: max-w-2xl mx-auto, mt-20, bg-surface-card, rounded-2xl, p-8, max-h-[80vh] overflow-y-auto
- Close button: Lucide "X" icon, absolute top-4 right-4
- Close on backdrop click
- Headings: text-white font-bold, sections: text-gray-300

TermsModal.tsx — Title: "Terms of Service"
Sections: Scope of Work, Payment Terms (100% advance), Delivery Commitment, Intellectual Property, Limitation of Liability, Governing Law (India)
Key lines:
- "Scope of work is limited to the specifications agreed upon at purchase. Any additions constitute a new order."
- "Full payment is required before project commencement. No refunds after delivery of the preview link."
- "Client is responsible for providing all content (text, images) within 48 hours of payment."

PrivacyModal.tsx — Title: "Privacy Policy"
Sections: Data Collection (WhatsApp contact, business info only), How We Use It, No Data Sale, Storage (we don't store personal data on servers), Contact
Key lines:
- "We collect only the business information you voluntarily share via WhatsApp to complete your project."
- "We do not sell, trade, or transfer your information to third parties."
- "Communication is stored within WhatsApp's infrastructure per their privacy policy."

DeliveryModal.tsx — Title: "Delivery Timeline Policy"
Sections: Standard Delivery (72 hours from content receipt), Rush Delivery (₹999 add-on, 48hr), What Starts the Clock (payment confirmed + all content received), Delays (client-caused vs agency-caused)
Key lines:

- "The 72-hour window begins when: (1) payment is confirmed and (2) all required content is submitted."
- "Delays caused by incomplete content from the client pause the delivery clock."
- "If we miss the 72-hour guarantee through our own fault, you receive a full refund of ₹4,999."

RevisionModal.tsx — Title: "Revision Policy"
Sections: What's Included (2 rounds), What Counts as a Revision (layout, copy, colors, sections),
What Doesn't (new pages, new features, complete design overhaul), Additional Revisions (₹500/round)
Key lines:
- "Each revision round covers multiple changes submitted together. Please consolidate all feedback before submitting."
- "A revision round is not consumed until you explicitly request changes after viewing the preview."
- "Major feature additions (contact forms, booking systems, galleries) are scoped and priced separately."

==========
SECTION 17 — UI COMPONENTS SPECIFICATIONS
==========

GlassCard (components/ui/GlassCard.tsx):
Props: { children, className?, hover?: boolean }
Base styles: bg-white/[0.03] backdrop-blur-sm border border-white/[0.08] rounded-2xl p-6
hover=true: group, hover:border-purple-500/40 hover:bg-purple-500/[0.05] transition-all duration-300
Framer Motion: whileHover={{ scale: 1.02 }} when hover=true

BentoCard (components/ui/BentoCard.tsx):
Props: { children, className?, span?: 1|2 }
Same base as GlassCard but with col-span-{span} in grid, minimum height: 200px
Inner layout: flex flex-col, gap-4

SectionHeader (components/ui/SectionHeader.tsx):
Props: { eyebrow: string, title: string, subtitle?: string }
eyebrow: uppercase, text-xs tracking-[0.2em] font-semibold text-purple-400
title: Plus Jakarta Sans, bold, text-3xl md:text-4xl lg:text-5xl, text-white, leading-tight
subtitle (optional): text-gray-400, text-lg, max-w-2xl mx-auto
All centered, mb-12 md:mb-16

==========
SECTION 18 — LENIS SMOOTH SCROLL (lib/lenis.ts)
==========

Create a Client Component "SmoothScrollProvider":
  - Initialize Lenis in useEffect:
      const lenis = new Lenis({ duration: 1.2, easing: (t) => Math.min(1, 1.001 - Math.pow(2, -10 * t)) })
  - Set up requestAnimationFrame loop: function raf(time) { lenis.raf(time); requestAnimationFrame(raf) }
  - Connect Lenis to Framer Motion's scroll events
  - Return children wrapped in fragment
  - Cleanup on unmount

Import and wrap layout.tsx children in <SmoothScrollProvider>

==========
SECTION 19 — PERFORMANCE & SEO REQUIREMENTS
==========

- All images: use Next.js <Image /> with priority on above-fold images, lazy loading below
- No external image CDN dependencies — all visuals are SVG-based (coded inline)
- Framer Motion: use LazyMotion with domAnimation feature bundle to reduce bundle size
- Use dynamic imports for modal components: const TermsModal = dynamic(() => import(...))
- Add loading="lazy" to all below-fold components
- Metadata in layout.tsx must include Open Graph tags:
    og:title, og:description, og:type: "website", og:locale: "en_IN"
- Add JSON-LD schema for LocalBusiness:
    @type: "LocalBusiness", name: BRAND_NAME, address: Kota Rajasthan,
    priceRange: "₹4,999", serviceType: "Web Design"
- Target Lighthouse score: Performance > 90, Accessibility > 95, SEO > 95

==========
SECTION 20 — MOBILE-FIRST RESPONSIVE RULES
==========

All layouts follow: mobile-first, then sm: md: lg: xl: breakpoints
- Navigation: hamburger drawer on mobile, horizontal on md+
- Hero: single column on mobile, content centered; browser mockup below text on mobile, side-by-side on lg
- Bento grid: single column on mobile, 2-col on md+
- Comparison table: horizontal scroll on mobile (overflow-x-auto wrapper)
- Process steps: vertical stepper mobile, horizontal desktop
- Footer: stacked single column mobile, 4-col desktop
- Testimonial marquee: narrower cards on mobile, normal on desktop
- All touch targets: minimum 44x44px
- Font sizes: use clamp() for fluid typography everywhere

- CTA buttons: full-width on mobile (w-full), auto-width on sm+

==========
SECTION 21 — ANIMATION SYSTEM
==========

Establish these reusable Framer Motion variants in /lib/animations.ts:

```
export const fadeInUp = {
  hidden: { opacity: 0, y: 30 },
  visible: { opacity: 1, y: 0, transition: { duration: 0.6, ease: [0.22, 1, 0.36, 1] } }
}

export const staggerContainer = {
  hidden: {},
  visible: { transition: { staggerChildren: 0.12 } }
}

export const scaleIn = {
  hidden: { opacity: 0, scale: 0.92 },
  visible: { opacity: 1, scale: 1, transition: { duration: 0.5, ease: [0.22, 1, 0.36, 1] } }
}
```

All sections use: <motion.div initial="hidden" whileInView="visible" viewport={{ once: true, amount: 0.2 }} variants={staggerContainer}>

==========
SECTION 22 — FINAL ASSEMBLY (app/page.tsx)
==========

Import and render components in this exact order:

```
<main className="relative overflow-hidden">
  <div className="mesh-gradient fixed inset-0 -z-10 opacity-60 pointer-events-none" />
  <Navbar />
  <Hero />
  <PainPoints />
  <Solution />
  <ComparisonMatrix />
  <Process />
  <Portfolio />
  <Testimonials />
  <FinalCTA />
  <FAQ />
```

```
  <Footer />
</main>
```

Modal state management: Use a single ModalContext (React Context) in layout.tsx to control which modal (if any) is open. Footer legal links dispatch to this context.
Render all 4 modals at root level inside layout.tsx wrapped in AnimatePresence.

==========
BUILD THIS. DO NOT SIMPLIFY. DO NOT USE PLACEHOLDER TEXT.
USE EXACT COPY PROVIDED. ALL ANIMATIONS ARE REQUIRED.
==========
